The experience finishes with a full body massage

### **WATER MASSAGE**

**60 min. / 170**

An excursion into weightlessness.

The Water massage in the Vals thermal exercise pool is an application of alternative medicine or hydrotherapy. The therapist stands in chest-deep water and moves the guest in accordance with predetermined figures, thus combining the positive properties of water with the basic effects of Shiatsu. The treatment takes place in 35 ° C water. The body -weightlessly floating in the water- undergoes passive lengthening and stretching. Here, the drag of the water enhances the technique. There is a feeling of weightlessness inducing a deep relaxation. The treatment also benefits from the healing properties of the warm thermal waters of Vals, such as improved peripheral circulation and a relief of the joints.

### **ACUPUNCTURE**

**60 min. / 170**

Acupuncture is a therapy aimed at transmitting information within the body, whose sources of information are known as meridians. The treatment involves restoring a balance between the meridians. Our experienced therapist begins by running through your medical history and discussing in detail your physical state and any ailments. She conducts a pulse, stomach and tongue diagnosis to determine precisely which acupuncture points and course of treatment best meet your needs. The addition of manual elements such as massages with ESPA products complete this treatment.

## **ESPA SIGNATURE TREATMENTS**

Scientific studies show that it not only inhibits depression, but also promotes enduring changes in mood and levels of happiness and wellbeing.
